MISSION

Heartland Conservation Alliance proactively conserves, protects and restores natural lands within the Kansas City region, benefitting the community and future generations by improving water quality, creating recreational opportunities, protecting life and property, and preserving our natural and cultural heritage. We accomplish our goals through collaboration with a network of public and private organizations and agencies that share our goals, values and objectives, and through public outreach and education.

STRATEGIES

CONSERVING NATURE | CONVENING COMMUNITY | CONNECTING PEOPLE TO NATURE

Creating and managing collective impact requires a separate organization(s) with staff and a specific set of skills to serve as the backbone for the entire initiative and coordinate participating organizations and agencies
